SHRUBS

PLANTS

FOR IOWA PLANTING 1929

FROM

CRESCO NURSERY

Since 1877

A. E. BENTS & SON

CRESCO, IOWA

It is not our aim to sell for less, but to produce a better article

GENERAL INFORMATION

We guarantee all stock which has been shipped from our Nursery to be true to name and label, of specific size, clean, healthy first class stock. Furthermore, we will furnish trees and shrubs free of charge for those which fail to start within two months of planting (*) provided we are notified by July 1st of that year. It is mutually agreed and understood, however, between the purchaser and ourselves that we cannot be held responsible for an amount greater than the original purchase price of the stock.

Adjustments—It is our chief aim to deliver to our customers a full measure of satisfaction. We exercise the utmost care in filling your orders, but in the rush of the season errors will sometimes occur. Please keep a duplicate of your order and should an error or shortage be made, advise us at once and we will promptly and cheerfully correct it.

Prices—The prices in the list cancel all previous quotations. All stock except where noted is quoted F. O. B., Cresco, Iowa.

Remittances—Charge accounts increase operating expense and this in turn increases the cost of the stock, so remittance should accompany order whenever possible. If this is not satisfactory write us and we can make arrangements to suit your convenience.

Inspection—Certificate of Inspection will be furnished with every shipment.

(*) We cannot guarantee stock marked (*) as weather and soil conditions govern their success.

WORK WITH NATURE NOT AGAINST HER

APPLES

Summer

- DUCHESS—An old reliable; good size, yellow, streaked red, juicy, sub-acid, productive.
- EARLY HARVEST—(Tetofsky) Good all-around early, medium size, pale yellow, tender and juicy.
- HARTER'S EARLY—Earliest apple grown, ripens a week in advance of Yellow Transparent, red, good quality.
- YELLOW TRANSPARENT—The earliest apple to ripen; large, yellow.
- ERICKSON—Very large; hardy, productive, good quality.

Fall

- WEALTHY—Of medium size, smooth; nearly covered with dark red. Bears heavy, keeps well in storage.
- OKABENA—Medium size, hardy and productive; good quality; red.
- LONGFIELD—Another medium size apple; yellow, good eating quality; very productive.
- FARNSWORTH—Large, almost transparent in color; ripens during late fall, very good quality but not a good keeper; tree is very hardy and a good grower. This variety was originated by A. E. Bents.
- WHITE PIPPIN—A good quality, early fall apple. PATENT GREENING—Free from blight; vigorous; bears early and abundantly; good cooking apple.

Winter

- NORTHWESTERN GREENING—Vigorous, spreading growth; fruit large, pale green, sub-acid, good quality.
- MALINDA—Tree of crab-like growth, hardy, very productive. Fruit yellow, "Sheep-nose" shape mild acid and the best of keepers.
- McINTOSH—Fruit good size; bright crimson. The choice early winter variety.
- SALOME—A winter sort of merit that is proving very hardy and productive; fruit medium size; good quality; yellow splashed with red. Comes into bearing early, keeps until April.
- BEN DAVIS—Good quality; fruit large and round; yellow splashed with red; good keeper.
- DELICIOUS-Not entirely hardy.

CRABS

- WHITNEY—Hardy, thrifty, upright grower. Fruit large, red and of good quality for canning or eating.
- EARLY STRAWBERRY—Earliest of all to ripen and very productive.

TRANSCENDENT—Productive; red, juicy fruit, acid. A good variety but should not be planted too close to other apples as it is subject to blight.

IMPROVED BRIER SWEET—Medium to large

size; early; fine quality.

All the above varieties each per 10 4 to 5 ft. 3 year 50 5 to 6 ft. 3 year 60 5 . 00

PLUMS

The New Minnesota Plums

These varieties were produced by crossing the Japanese sorts with our hardy native varieties. They are perfectly hardy and begin to bear early, producing fruit equal in quality and size of the best California plums. We invite you to visit our nursery during plum season.

UNDERWGOD—This is the earliest of the large new plums, ripening August 1st to 15th, and attaining a size of 1¾ inches in diameter. Fruit is red, juicy; very small pit, free stone. In our

opinion, the best.

TONKA—Very productive. Fruit uniform in size, averaging 1¾ inches. Season, August 15th. Red, sweet, free stone.

LORING PRIZE—The very largest of this group; fine quality but more subject to plum rot than others.

RED WING—Very large; bright red; free stone; good quality.

ELLIOTT—Large, firm bright red; good quality; small pit; very late.

MONITOR-Very large, round; dark red; firm; late.

Hanson Plums

WANETA—One of the largest and best all-around standard plums. Bright red, delicious quality, small pit, quite productive, fruit sometimes two inches in diameter.

SAPA—It is very early and a prolific bearer; fruit medium size dark purple and rich, red flesh. Best jelly hybrid and a good canner.

Cherry-Plum Hybrids

ZUMBRA—A hardy substitute for the black sweet cherry. This will please you. Medium size with small free pit. One of the best for canning when fully ripe. We recommend this variety.

ST. ANTHONY—Another good hybrid similar to Sapa but more vigorous; very productive. Fruit of good size, purple flesh; excellent for jelly or canning.

GOOSEBERRIES

DOWNING-Light green when ripe; the best variety for general planting.

EVERGREENS

Evergreens are a specialty with us. All windbreak trees are grown from seed on our grounds. During our fifty years of experience we know our methods are the best for this locality.

Our prices include warranty, but where stock is boxed for shipment we cannot warrant same.

An x following variety denotes number of times transplanted.

Arbor Vitae (American)

This variety can be planted on moist situations and in partial shade with assurance. Makes a very dense tree, and should be used for inside row or for planting in. Best for hedges; stands shearing well.

		per 100
8 to 12	in.—x	18.00
8 to 12	in.—xx	24.00
12 to 18	3 in.—xx	30.00
18 to 2	i invv	35.00

Norway Spruce

In our opinion the best all-around tree for wind-breaks. Succeeds on all types of soil.

	per 100
8 to 12 in.—x	16.00
8 to 12 in.—xx	22.00
12 to 18 in.—xx	28.00
18 to 24 in.—xx	34.00
2 to 3 ft vy	40.00

White Pine

Sorry we do not have this fine, fast-growing lumber tree in quantity. We only have a few.

				per	100
8	to	12	in.—xx		22.00

Douglas Fir

A scrubby tree when small but increasing in beauty with age. Good for windbreak or ornamental planting.

		per 100
12 to 18	in.—xx	26.00
18 to 24	in.—xx	32.00
2 to 3 f	t.—xx	40.00

Balsam Fir

A good windbreak evergreen but short lived—thirty or thirty-five years being its limit. A good filler for new planting and the demand for Christmas trees will give you a good return.

		per 100
8 to 12	in.—xx	18.00
12 to 18	3 in.—xx	28.00

Colorado Spruce (Green)

These are the trees which are not good color when small, often after a few years they change to blue. This variety is considered the most beautiful of the confers. Although slow growing they make a tree superior to any in all ways.

			per 100
12 to	18	in.—xxx	 50.00

ORNAMENTAL EVERGREENS

(NO WARRANTY)

As most all evergreens in this class are planted on graded ground and where care insures their success we cannot give warranty in any way. All trees in this group are dug with ball of earth and burlaped.

Colorado Blue Spruce (Good Color)

Always good shape and make a real ornamental tree.

	.10
SCARLET WONDER—Very large deep scarlet florets on tall strong stems	.20
SMITH, BYRON L.—White, delicately suffused	
light mallow purple, deeper at outed edges, throat Marguerite yellow with	
etchings of mallow-purple at base	10
VAN FLEET, DR. W.—Delicate rose pink, deepening at the edges of the petals.	
Throat of softest canary yellow beauti-	
fully blended. Extra tall and slender spikes. Very early	10
WALSH, MRS. JOHN R.—Heavily ruffled,	
flesh pink. Three lower petals of flame shading into dark ruby at the throat.	
	.35
WHITE PIGEON—Pure white. Very good	.15

We do not encourage the planting of mixtures, as some varieties increase much faster than others and in a few seasons the mixture is "run out" and you are planting all your bulbs for the sake of a few which you like.

If, however, you want mixtures, we will be glad to make them up for you using the colors you like and at the price you wish.

PERENNIALS

(For Fall Planting 1929)

PEONIES

Peonics are of the easiest culture and when once planted they thrive for many years without attention other than cultivation and winter mulching. They are almost immune to insect rayage and disease.

Festiva Maxima M .50 L 1.00

Very large white center fleeked crimson

Early.

Karl Rosenfield M 1.25 L 2.50

Brilliant dark crimson. Midseason.

Officianalis Rubra M 1.00 L 2.00

Large blooms of vivid crimson. Very early.

PHLOX

This is one of the most useful flowers for summer decorations, the colors varying from pure white to deep crimson. They are not at all particular as to soil. To obtain good results it is wise to manure the soil well and give them a fairly open situation.

Once planted they require no further care for saveral years, but it is advisable to renew them about every fifth year.

Phlox may be planted very early in spring as well as fall.

10 at 7 times the price for each 5 at 4 times the price for each.

Eclaireur

Brilliant rose magenta with large lighter halo.
Mrs. Jenkins M .20 L .50
A very free-flowering early pure white.

PAY OUR NURSERY A VISIT

We have spent the better part of our lives in the study of methods and varieties for this locality. Our experience is at your service. We realize that you must prosper, otherwise we will not, so our sales must bring us other sales. If it does not we feel we have failed to do our part.

We sell direct to our patrons. We have no agents and pay no commissions, and what we cannot grow we do not sell.

We will always be glad to quote special prices to churches, societies, clubs and other organizations.
